**Online Bill Pay Upgrade: Changes in Default Funding Account**

A great new feature in the upcoming online bill pay enhancement is the ability to set a preferred funding account per payee. **The current default funding account will not be converted.** Therefore, it is very crucial for you to review your funding account for each payee before a payment is sent after the launch date of June 23rd to ensure funds will come out of the intended account. The preferred funding account will remember the last account a payment was made from for each payee, and will remain the same until a new funding account is used.
